

FLORIDA INTERNATIONAL UNIVERSITY

BIOMEDICAL ENGINEERING LECTURE SERIES

BALLOONS, STENTS, GLAUCOMA, SHUNTS AND OTHER MEDICAL DEVICES: BIOTECHNOLOGY AND ENTREPRENEURSHIP

Dr. Pinchuk, a successful inventor, entrepreneur and founder/co-founder of eight medical device companies will discuss his experiences in organizing a company. He will also address the process of selecting a product and negotiating with venture capitalists, industry, universities and employees.

Dr. Pinchuk manages the necessary funding for the companies and interacts with the biomedical community, to achieve Innovia's goal of producing medical devices previously unattainable with conventional biomaterials in order to improve the lives of human beings. He received a B.S. degree in Chemistry from McGill University in 1976 and a Ph.D. in the fields of Chemistry, Engineering and Medicine from the University of Miami in 1984. In 2003 he was inducted into the University of Miami Iron Arrow Society (Highest Honors) and in 2005 received an honorary Doctor of Science degree from McGill University.

FRIDAY, SEPTEMBER 15TH AT 11:00 A.M.

**FIU Engineering Center
10555 West Flagler St., Room 2300
Miami, FL 33174**

Presented by:

**DEPARTMENT OF
