

Wallace H. Coulter Foundation Biomedical Engineering Seminar Series

DR. TARAK RAMBHATLA, is a clinical cardiologist. He specializes in the diagnosis and treatment of complex cardiovascular disease including critical care cardiology, cardiomyopathies, valvular heart disease, arrhythmias, coronary artery disease, and heart failure. He completed his cardiology training in New York City, where under the direction of world renowned Echocardiographer Itzhak Kronzon, he mastered the utilization of echocardiography in assessment of hemodynamics and valvular heart disease, using both transesophageal and transthoracic echo. His other interest includes heart rhythm disorders, particularly early detection and management of atrial fibrillation, an arrhythmia that leads to heart failure and strokes, and affects more than 2 million Americans. He has given lectures both nationally and internationally on this topic. He is a published author in several renowned scientific journals, including the International Journal of Cardiology and JACC EP. He is also the lead author for the upcoming Echocardiography Companion, a Board Review Preparation Book for Clinicians. He is an active member of several professional societies, including the American College of Cardiology, American Society of Echocardiography, Cardiac Electrophysiology Society, and Society of Cardiovascular Computed Tomography.

CARDIO VASCULAR DISEASE: PREVENTION TO AVOID TREATMENT

ABSTRACT: Cardiologist Tarak Rambhatla, M.D., has joined Miami Cardiac & Vascular Institute, part of Baptist Health South Florida and the region's largest and most comprehensive cardiovascular facility. Dr. Rambhatla specializes in the prevention, diagnosis and treatment of complex cardiovascular disease and its risk factors. Among the conditions he treats are congenital heart defects, coronary artery disease, heart rhythm disorders and heart failure. He is affiliated with Baptist Hospital of Miami and West Kendall Baptist Hospital and sees patients at 7400 SW 87 Avenue, Suite 100, in Miami.

Dr. Rambhatla earned his medical degree at St. George's University School of Medicine in Grenada, West Indies, and also studied

at Northumbria University in Newcastle, England, through the International Medicine Pathway program, where he graduated cum laude. He completed a residency in internal medicine and a fellowship in cardiology at Lenox Hill Hospital, Hofstra-Northwell School of Medicine in New York, N.Y., serving as chief resident and chief fellow. Dr. Rambhatla is board certified in internal medicine by the American Board of Internal Medicine. He also is certified by the Society of Cardiovascular Computed Tomography, American Society of Echocardiography and Certification Board of Nuclear Cardiology. In addition, he has the added qualification as a Registered Physician in Vascular Interpretation from the American Registry for Diagnostic Medical Sonography.

Through the generous support of the Wallace H. Coulter Foundation, the Department of Biomedical Engineering facilitates weekly lectures each year during academic terms. Experts in all areas of Biomedical Engineering are invited to provide a research seminar and to meet with faculty and students to discuss the latest developments and research in Biomedical Engineering.
